

# PRESS RELEASE

April 14, 2023 - La Grande Motte, France

## A NEW ERA AT FOUR WINNS

Today, Four Winns is excited to announce its recent achievement, receiving the 2023 Multihull of the Year Award in the multipower category awarded by Multihulls World Magazine. After the successful H-series in 2022, Four Winns broke conventional barriers and tradition and expanded into the world of multi-hulls with the introduction of its twin-hull, the all-new TH36.

Four Winns has been committed to the finer side of life for nearly 50 years, and the company's dedication to innovation and elevating the boating experience, bringing luxury and comfort on the water to all its clients. Hand-crafted in Cadillac, Michigan, Four Winns launched into the international market space with iconic bowriders within the H-Series and HD-Series. The first ever Four Winns twin hull, the TH36, was introduced at the 2022 Cannes Yachting Festival and receipt of the prestigious Multihull of the Year award is a true testament of the brand's international reputation.

### **The secret behind this refined and iconic catamaran**

Using its deep knowledge of bowriders and deck boats to inspire the future of the brand and stretching the American Dream over to international waters, Four Winns championed Marc Lombard and the famed Italian Garroni Design Studio to develop something entirely new for Four Winns. Synonymous to the expertise of Four Winns' bowriders, the secret behind the refined and iconic catamaran design is inspired by its very own HD-Series.

Passionate about aesthetics and style, the Garroni Design studio integrated form and function into this exceptional model with its ability to comfortably accommodate up to 15 people for a memorable day out on the water and with the inclusion of the extensive CFD calculation expertise of Marc Lombard and his team of engineers, the development of the elegant and precise hull shape of the TH36 was created.

By combining the spaciousness of a deck boat and inspirational sleek lines of a Four Winns, the TH36 catamaran is crafted with great attention to detail and emerges as the epitome of timeless design making a significant impression internationally. The forward cockpit area welcomes seating for six (6), and the extremely versatile aft cockpit offers plush seating and tables on sliders offering three (3) different layouts allowing the flexibility to enjoy refined moments on the water with those you love.

The spacious open-air wheelhouse provides a port-side double seat with a captain chair on the starboard side. The central galley area includes spacious storage and a modern style kitchenette with a sink, cooktop, and refrigerator with the options for dual refrigerators and a grill. Below deck, contemporary elegance flows through two full suites furnished with queen beds, ambient lighting, privacy blinds, and plenty of storage space. Each ensuite has its own private head equipped with a separate, enclosed shower area.

“From watersports to cruising, from lakes to salt waters, we want every boater to enjoy the refinement of Four Winns and benefit from our new technologies.” - Nicolas Harvey, Brand Director

### **\_Instinctive boating with state-of-the-art technology**

Known best for their spacious smooth rides, catamarans have steadily become popular among avid boaters. Greater visibility and improvements in technology have made catamarans easier to maneuver and dock, making them extremely attractive to boaters.

In Four Winns’ ongoing commitment to fulfill the needs and desires of its boaters, the TH36 is outfitted with joystick piloting technology for easy docking and maneuverability. These systems directly communicate with the owners’ choice of two 300hp or 350hp engines. Preliminary testing is impressive showing a smooth and comfortable cruising speed at 25 knots. The TH36 will offer many customizable features including interior and exterior colors, electronic packages, and the addition of roof racks and rod holders.

### **\_World Tour**

The official start of its World Tour Launch begins with the official appearance of the TH36 at the International Multihull Show, April 12-16, 2023, in La Grande Motte, France, where the TH36 was recently awarded the 2023 “Multihull of the Year” in the multi-power category by Multihulls World Magazine.

After its departure from La Grande Motte, France, the TH36 will proudly display its achievement as it continues its 2023 World Tour Launch.
